Wall Chargers & Adapters

A mobile-accessories family focused on wall chargers and power adapters. The selection varies by output wattage, port count, size, and travel suitability.

Introduction

A mobile-accessories focused on wall chargers and power adapters. The selection varies by output wattage, port count, size, and travel suitability.

The product entries below are written in a website style, with short descriptions and practical details that a customer or chatbot could use to compare options.

1. NovaCharge 20W USB-C Charger

A compact single-port charger for everyday fast charging of phones, earbuds, and small accessories.

- 20W USB-C Power Delivery output
- Foldable prongs and pocket-friendly body
- Best for users who want a simple travel-ready charger

Fits most modern smartphones and pairs well with a USB-C to USB-C cable.

2. DuoBoost 35W Dual-Port GaN Charger

A slim GaN charger with two ports for users who need to charge a phone and a secondary device together.

- 35W total output
- USB-C + USB-A ports
- Balanced for home desks, bags, and office use

Useful when the user asks for both fast charging and more than one port.

3. FlexCharge 45W Travel Charger

A higher-output charger for power users who want extra speed without carrying a bulky adapter.

- 45W USB-C output
- Fast-charging support for tablets and phones
- Travel-friendly shell with reinforced plug

A good recommendation when the user needs something stronger than a basic 20W charger.

4. ProDock 65W GaN 3-Port Charger

A multi-device GaN charger designed for users carrying a phone, tablet, and laptop accessories.

- 65W max output
- Three ports for shared charging
- Smart power split for multiple devices

Useful for customers comparing chargers by wattage and number of ports.

5. FastLink 30W USB-C + USB-A Charger

A practical mid-range charger for mixed-device households and office setups.

- 30W total output
- USB-C and USB-A compatibility
- Compact body with everyday durability

Good for customers who are not ready to switch fully to USB-C accessories.

6. MiniCube 20W Compact Charger

A small square charger aimed at users who value portability and a minimal footprint.

- 20W output
- Ultra-compact design
- Ideal for carry-on bags and small desks

A strong fit when the user wants the smallest possible charger for a phone.

7. TwinPort 40W Foldable Charger

A dual-port charger with a foldable plug for commuters and frequent travelers.

- 40W output
- Two outputs for shared charging
- Foldable plug for easier packing

Useful when the user asks for a charger that is easy to carry and share.

8. SafeVolt 18W Everyday Charger

A basic charger for users who only need reliable standard-speed charging.

- 18W USB-C output
- Simple single-port design
- Budget-friendly catalog option

Suitable for customers who prioritize price and basic reliability over premium speed.

9. UltraCharge 100W 4-Port Charger

A premium charger built for workstations where several devices need power at the same time.

- 100W maximum output
- Four ports for multi-device charging
- Premium build for heavier usage

Best for customers comparing high-capacity chargers for shared desk environments.

10. WorldTravel 65W Adapter Kit

A travel adapter bundle that supports multiple plug regions and includes charging flexibility for trips.

- 65W charging capability
- Multi-region plug support
- Ideal for international travel

This product is useful when the customer needs both a charger and a travel adapter in one purchase.
